

Introducing...the newly designed

Foot WAFFLE® *Custom*

Changing '**FOUR**' the better!

1

1. **Sloped Design** mirrors the natural shape of the leg as it angles down the calf to the ankle, securely holding the leg and foot in place.

3

2. **Air-Filled Leg Straps** offer pressure ulcer prevention as well as patient comfort across the top of the leg and foot.

2

3. **Air-Filled 'Pillow' Pad** at the bottom of the foot comfortably floats the patient's foot and assists in preventing ankle contractures as well as maintaining normal ankle alignment for patients with foot drop.

4

4. **Air-Filled Foot Strap** and newly modified ankle section prevents shifting of the foot within the product.

Foot WAFFLE® *Custom* surrounds the lower limb in air.

Air-Filled Foot Strap safely prevents the foot from shifting in the product.

Adjustable Foot End Flaps across the bottom of the product accommodate multiple foot widths and clinical applications.

Heel Flap floats the heel or may be adjusted to protect the heel.

Lower Profile Design across the bottom of the product aides in holding the foot in proper alignment.

Wider Opening across the top of the leg allows for more air circulation.

Indications for use:

Heel and lower extremity protection and healing therapy thru Stage IV pressure ulcers. Deep tissue injury protection.

Single Patient Use.
Latex Free.

The WAFFLE Heel Elevator *Custom* has the same enhanced features and benefits of the Foot WAFFLE *Custom*, only it fits lower on the patient's leg.

The Heel Elevator comes in one convenient size, and fits most patients. Consider using Foot WAFFLE *Custom* for extremely large or small calf sizes.

WAFFLE Heel Elevator® *Custom*
