

Clinical FAST FACTS

ATR+™ Pro

Turning and Repositioning System

1 TURN

Turn your patients like a PRO! The ATR+Pro System with Position Perfect Wedges promotes proper spinal alignment and sacral offloading throughout the patient turn.

2 REPOSITION

The ATR+ Pro Turning and Repositioning System takes safe patient handling to a whole new level.

The ATR+Pro turns, repositions, boosts, transfers and keeps patient's dry.

New Extender Straps offer multiple hand placement options for safe and smooth patient repositioning. **Easy for the caregiver. Easy on the patient.**

Designed to remain seamlessly under patients, the ATR+ Pro is always ready, willing and able to assist. And a breathable inner foam core minimizes bunching under the patient.

Pro performance without placing undue stress and strain on the caregivers.

3 MICROCLIMATE

Excessive heat and moisture is not good for the skin and it's just not comfortable. The ComfortTop™ ES Absorption Pad's exceptional moisture wicking capabilities, absorbs 98% of 100ml of fluid in under 60 seconds. *That's fast.*

The ComfortTop ES works in tandem with the repositioning sheet by covering a greater surface area. **Patients stay dry and comfortable**

4 TRANSFER

Patients typically don't remain in the same place throughout their hospital stay.

The ATR+ Pro system aids in smooth transfers for patients on the GO!

5 BOOST

You can't stop gravity, but you can outsmart it with the **ATR+ Pro Repositioning sheet.**

Multiple straps along each side helps the caregiver smoothly boost patients with minimal discomfort.
